EDUCATION

Arizona State University

Tempe, AZ

B.S. in Computer Science, Minor in Business, GPA: 3.96/4.00

Expected May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management, Software Engineering, Machine Learning, Artificial Intelligence, Data Visualization, Human Computer Interaction, Discrete Mathematics, Probability & Statistics
- **Member:** Rewriting The Code, SWE, Women in Computer Science, Girls Who Code, Girls With Impact, Grace Hopper 2025

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, Java, C/C++, Swift, HTML/CSS

Frameworks & Libraries: React, FastAPI, Node.js, Express, MongoDB, MySQL, Firebase

Tools: Git, Docker, Linux/Unix CLI, VS Code, Xcode, Postman, GitHub Actions, Microsoft Excel, Google Workspace

Technical Focus: Full-Stack Software Engineering, RESTful APIs, Distributed Systems, Cloud Platforms (GCP), CI/CD

EXPERIENCE

Full-Stack Software Engineering Intern

Aug 2024 – Present

Learning Engineering Institute, Arizona State University — Tempe, AZ

- Developing a full stack GenAI literacy platform using **React** and **backend APIs** to support structured evaluation of misconceptions across ASU stakeholders.
- Implementing **scalable data models** and **analytics workflows** to process **100+ survey responses**, enabling reproducible analysis for learning engineers.
- Building and deploying a **production-ready prototype** used in internal demos and research workflows, reducing manual analysis effort by approximately **30%**.

Software Engineering Intern

Aug 2025 – Present

Grey-Box — Tempe, AZ

- Developing an **AI-powered cross-language Wikipedia semantic analysis** system using **TypeScript**, **Python**, and **FastAPI**, enabling translation and comparison across **20+ languages** and improving review efficiency.
- Implementing **NLP-based semantic gap detection** using **sentence embeddings** and **LLM reasoning** to identify missing and altered content across **100+ Wikipedia articles**.
- Building a modular **FastAPI backend** and **Electron desktop frontend** with reusable components, reducing manual comparison and review effort by approximately **35%**.

Full-Stack Developer Intern

June 2023 – July 2023

Onward Technologies Limited — Pune, India

- Developed and optimized **enterprise web applications** using **HTML**, **CSS**, and **JavaScript**, improving scalability and reducing load times by **50%**.
- Delivered **production-ready front-end solutions** deployed to over **5,000+ daily users**, increasing engagement by **40%**.

PROJECTS

GitHired – CalHacks Winning AI Developer Hiring Platform | React, ChromaDB, Elasticsearch

Oct 2025

- Built an **AI-driven hiring platform** analyzing **real GitHub activity** to generate developer **hireability scores** using NLP-based embeddings.
- Developed **backend systems** for **AI mentoring** and **GitHub job matching** using **Composio MCP** and **Claude APIs**.

FinMate Coach – AI Financial Wellness Platform | Next.js, TypeScript, OpenAI API

May 2025

- Built a **personalized AI finance coach** that analyzes spending habits and delivers **real-time budgeting insights**.
- Integrated **OpenAI API** to generate **actionable financial recommendations** and conversational guidance.

Swappi – iOS Social Connection App | SwiftUI, Firebase, Perplexity AI

Mar 2025

- Designed and built an **AI-driven social app** for **skill- and mood-based matching** with a **real-time Firebase backend**.
- Integrated **Perplexity AI API**, improving **match relevance** by **35%**.

LEADERSHIP & ACHIEVEMENTS

Perplexity Campus Partner

Sep 2025 – Present

- Selected as a **campus representative** to promote and integrate **Perplexity AI** tools, driving adoption among student developers.

Vice President, Indian Students' Association

May 2025 – Present

- Led partnerships and event operations for **2000+ students**, increasing engagement in technical and cultural initiatives by **40%**.

Secretary, Women in STEM

Jan 2025 – Present

- Coordinated outreach and mentorship programs to promote **diversity and inclusion in computing**.

Hackathon & Scholarship Achievements

2024 – 2025

- **Winner – WiCS Hackathon (Best Use of Perplexity):** Built an **AI research assistant** leveraging the **Perplexity API** for real-time summarization.
- **CalHacks Winner – Best Use of Composio Tool Router:** Built an **AI-driven hiring platform (GitHired)** that analyzes real GitHub activity for intelligent developer evaluation.
